New Enabled Host

For each new enabled host, enter a fully qualified network name or IP address, a user name, and a password and then click the left arrow button. Once the list is complete, click the OK button to add the new enabled host(s) to the system. Click the right arrow button to remove candidate hosts from the list.

Candidate Enabled Hosts: 127.0.0.1 [cveva,****]

Host Information

Traditional Host OS
 VM Guest OS

Failed to add the enabled host

Server Failure: HostAgentRemoteImpl:doAddHostAgentWithCredentials
