HP StorageWorks NAS 1200s Quick Restore Instructions
First Edition (November 2003)
Part Number: 351781-001

NAS Quick Restore DVD

This Quick Restore DVD restores the NAS 1200s to its factory default state. The process outlined here restores your NAS device and reconfigures the internal operating system drives to its factory defaults.

 **CAUTION:** Read all material contained within this document before beginning. The NAS Quick Restore **will erase all data** on the system drives. Refer to the *HP StorageWorks NAS Administration Guide* and the *HP StorageWorks NAS Installation Guide* for information on backing up data prior to performing a Quick Restore procedure.

Requirements

The NAS Quick Restore DVD requires that the console be attached either through the Integrated Lights Out port or a directly attached keyboard, monitor, and mouse.

Quick Restore Procedure

1. Connect the console of the NAS device directly to an attached keyboard, monitor, and mouse, or the ILO port.
2. Insert the Quick Restore DVD.
3. Reboot the NAS device.
4. After the Quick Restore DVD has booted, select **Q** to continue with the Quick Restore Process.
5. Verify that you want to continue with the Quick Restore process by pressing **C** to continue in English or **O** to continue in Japanese.

 **CAUTION:** Do not interrupt the restore process once it is begun.

6. When all of the information has been restored from the DVD, the NAS server will automatically restart and eject the DVD.

NOTE: This Quick Restore DVD is intended for DVD drives that have a manually loading tray. If your DVD drive has an automatic tray, ensure that the DVD is removed when it is ejected.

Follow the procedures in the installation guide to complete configuration of the NAS device.
