 - [-] Device Analysis for DDS Drives
 - [-] Test script revision: V28.07.2009
 - [-] Date tested: Thu Nov 25 12:04:23 2010
 - [-] The drive has been checked in the following areas.
 - [-] Drive Serial Number : HU18281DM5
 - [-] Firmware rev 'WU8A' is up-to-date for 'DAT160' as of Tue Oct 28 19:00:00 2008.
 - [-] Rule 1 - Fatal Error Rule
 - [-] No Problems found
 - [-] Rule 2 - Write/ Read Errors Rule
 - [-] A new write/read problem had been detected in your drive.
 - [-] Please run the DDS Drive Assessment Test to determine the current health of your drive.
 - [-] Rule 3 - Media Usage Rule
 - [-] The drive has determined that there has been media loaded in the drive which is degraded.
 - [-] Continued use of this media could result in failed backups or contaminated drive heads.
 - [-] Please clean the drive and remove the degraded media.
 - [-] Media Serial Number(s) of degraded media:
 - [-] H-W86-HU18281DM5-5-42-00005
 - [-] Rule 4 - Cleaning Rule
 - [-] You have not been cleaning your drive often enough. Please clean the drive after every 5 backups regardless if the cleaning light is on or off.
 - [-] Rule 5 - Device Status Rule
 - [-] No Problems found
 - [-] Rule 6 - Device Configuration Rule
 - [-] No Problems found
 - [-] Rule 7 - Device Usage Rule
 - [-] No Problems found
 - [-] There were 7 rules checked.
- [-] Test 'DDS Drive Assessment Test' started on device 'HP DAT160' at address '234/0.0.0'
 - [-] Please load a non-critical Write Enabled data cartridge to be used by the test....
