## Abstract

This document provides HP ProLiant Essentials Rapid Deployment Pack—Windows Edition hardware and operating system support information.

## Related Documents

HP recommends reviewing the *HP ProLiant Essentials Rapid Deployment Pack Planning Guide* before reading this guide.

HP recommends reviewing the following documentation after reading this guide:

- *HP ProLiant Essentials Rapid Deployment Pack—Windows Edition Installation Guide*
- *HP ProLiant Essentials Rapid Deployment Pack—Windows Edition User Guide*

All of the documents can be found in PDF format at <http://www.hp.com/servers/rdp>, from the Rapid Deployment Pack CD autorun utility, at \docs on the product CD, and at .\docs on the Deployment Server.

## Where to Go for Additional Help

Refer to the following sources for additional information about the Rapid Deployment Pack.

## Online Resources

- Information about the Rapid Deployment Pack and the latest updates are available from the HP ProLiant Essentials Rapid Deployment Pack website at <http://www.hp.com/servers/rdp>.
- Regularly updated troubleshooting information, frequently asked questions, and specific how-to procedures are available at the HP ProLiant Essentials Rapid Deployment Pack Knowledge Base at <http://www.hp.com/servers/rdp/kb>.
- Problem-solving information and ideas from other IT professions are available in the ITRC User Forum “ProLiant Deployment & Provisioning” at <http://forums.itrc.hp.com/>.
- Information and resources about the Altiris Deployment Solution is available from the Altiris website at <http://www.altiris.com>.

## HP Contact Information

For the name of your nearest HP authorized reseller:

- In the United States, refer to [http://www.hp.com/service\\_locator](http://www.hp.com/service_locator).
- In other locations, refer to <http://www.hp.com>.

For HP technical support:

- In North America:
  - Call 1-800-HP-INVENT (1-800-474-6836). This service is available 24 hours a day, 7 days a week. For continuous quality improvement, calls may be recorded or monitored.
  - If you have purchased a Care Pack (service upgrade), call 1-800-633-3600. For more information about Care Packs, refer to the HP website at <http://www.hp.com>.
- Outside North America, call the nearest HP Technical Support Phone Center. For telephone numbers for worldwide Technical Support Centers, refer to the HP website at <http://www.hp.com>.

## **Supported Deployment Infrastructure**

This section provides operating system specific information for the components of the Rapid Deployment Pack—Windows Edition 2.20. This Rapid Deployment Pack release installs the Altiris Deployment Server 6.5 with Hotfix 1 and the HP ProLiant Support Pack 7.40.

For additional details about Deployment Server and NFS server requirements, refer to Chapter 2 of the *HP ProLiant Essentials Rapid Deployment Pack—Windows Edition Installation Guide*.

### **Deployment Server**

The Deployment Server can be installed on the following operating systems:

- Microsoft® Windows® 2000 Server
- Microsoft Windows 2000 Advanced Server
- Microsoft Windows Server 2003, Standard Edition
- Microsoft Windows Server 2003, Enterprise Edition

### **Automation Pre-Boot Environment**

MS-DOS is the only automation environment supported with the Rapid Deployment Pack—Windows Edition 2.20. FreeDOS is not supported. Future Rapid Deployment Pack releases will support Linux and Microsoft Windows Preinstallation Environment (WinPE).

### **NFS Server**

The NFS server can be installed on Red Hat Linux or SUSE LINUX.

### **Target Systems**

The operating systems that can be deployed on a target system are listed in the “Supported Operating Systems” section.

For pre-deployment instructions dependant on the operating system and hardware setup, refer to Chapter 2 of the *HP ProLiant Essentials Rapid Deployment Pack—Windows Edition User Guide*.

# Supported Target Platforms

The Rapid Deployment Pack supports deployment to the target platforms listed in Table 1.

<sup>1</sup> After certain deployment operations, the MAC address of the server might be set to 0. To resolve this issue, apply SoftPaq SP26187. Refer to Table 2 when applying this update to any ProLiant server with the NC7770 stand-up NIC.

<sup>2</sup> Disk drive size must be smaller than 137 GB to successfully complete image capture and deploy with ATA RAID.

<sup>3</sup> For the SATA storage model, RAID set through the ROM-Based Setup Utility (RBSU) is not supported.

<sup>4</sup> The server might stop responding when loading the Q57.DOS network driver. To resolve this issue, apply SoftPaq SP26187.

## Supported Deployment Mechanisms

The Altiris Deployment Server has several automated boot methods for deploying target systems. For information about automated preboot environments and available boot methods, refer to Chapter 4 of the *HP ProLiant Essentials Rapid Deployment Pack—Windows Edition User Guide*. Table 5 displays a matrix of supported target systems and the supported deployment mechanisms available for each system.

For target systems that connect to the Deployment Server using the Preboot eXecution Environment (PXE), a PXE-capable NIC is required. All newer ProLiant servers ship with PXE-enabled embedded NICs or PXE-enabled stand-up NICs. Some older servers that do not have PXE support can obtain support with a PXE-enabled stand-up NIC. Refer to Table 2 for a list of stand-up NICs with PXE support.

**Table 2: Stand-Up NICs with PXE Support**

NIC Model	Minimum Option ROM Version
NC1020	N/A
NC3123 <sup>1</sup>	N/A
NC7170	1.2.11
NC7770 <sup>2, 3</sup>	3.2.2
NC7771 <sup>3</sup>	6.2.11

<sup>1</sup> You must flash NC3123/Rev. I to enable PXE support. The IBAUTIL.EXE utility that updates the PXE firmware is available in SP23495.exe.

<sup>2</sup> Only NC7770/Rev. E or later is flash upgradeable. You must move the EPROM WRITE jumper on the board to enable. A firmware update is available in SP24987.exe.

<sup>3</sup> For Wake-on-LAN (WOL) support with stand-up NICs, WOL must be enabled on the NIC by the driver and RBSU.

Some servers require a firmware upgrade to use PXE in the Rapid Deployment Pack. Refer to Table 4 for details on required upgrades.

---

The default location of PXE or network boot in the boot order varies based on the server and the options installed. For the servers listed in Table 3, PXE or network boot must be placed first in the boot order to support the server.

(1) Mandatory upgrade for PXE support.

(2) Required to support Windows 2003 scripted install jobs. Recommended for various bug fixes and enhancements to the PXE firmware (version 3.1.15).

(3) Recommended upgrade. Refer to Customer Advisory EB030321\_CW1.

(4) Required for server MAC address issue referenced in Table 1.

(5) Required to support deployment on systems with no diskette drive.

## Supported Storage Area Network Connectivity

Storage Area Network (SAN) driver support for deploying servers that connect to a SAN and servers that boot from a SAN is provided for the following operating systems:

- Windows 2000 Server
- Windows Server 2003
- Red Hat Enterprise Linux 3 Update 5 for x86
- Red Hat Enterprise Linux 4 Update 1 for x86
- SUSE LINUX Enterprise Linux 9 Service Pack 1 for x86
- Novell Open Enterprise Server
- VMware ESX Server 2.5.2

SAN driver support is specifically for the following servers:

**Table 6: ProLiant Servers Supporting SAN Drivers**

ProLiant BL20p G2 <sup>1</sup>	ProLiant BL30p
ProLiant BL20p G3	ProLiant BL35p (ATA) <sup>2</sup>
ProLiant BL25p	

<sup>1</sup> This server is not supported with an Emulex Fibre Channel Host Bus Adapter (FC HBA).

<sup>2</sup> This server requires a system ROM dated 09/30/2005 or later to perform Boot from SAN deployments.

Manual procedures are required to create the SAN storage and set up the server hardware to boot from the SAN. For more information, refer to the Chapter 2 of the *HP ProLiant Essentials Rapid Deployment Pack—Windows Edition User Guide*.

## Supported Operating Systems

The Rapid Deployment Pack jobs in the Altiris Deployment Server Console enable the installation of supported operating systems, using either scripting or imaging, on supported platforms using the supported deployment mechanisms. The following tables display the supported platforms for each supported operating system. The specific platform might support additional operating systems that cannot be installed with the Rapid Deployment Pack.

### Microsoft Windows NT 4.0

Microsoft Windows NT® 4.0 with Service Pack 2 or later can be deployed using only image install to the platforms listed in Table 7. Scripted install is **not** supported.

## Microsoft Windows Server 2003

Microsoft Windows Server 2003, Standard Edition, Enterprise Edition, and Web Edition are supported. These operating systems can be deployed to the platforms listed in Table 9.

**IMPORTANT:** If you plan to perform scripted installations with PXE, refer to Table 4 for important firmware prerequisites. HP strongly recommends that you use the default UNDI driver in your PXE boot images (instead of the NDIS2 driver).

## **Red Hat Enterprise Linux AS/ES 3 Update 5 for AMD64 and Intel EM64T**

These operating systems can be deployed to the platforms listed in Table 12.

When deploying Linux to a ProLiant server with Intel dual-core processors, hardware limitations might exist or modifications to the Linux scripted install job might be required. For more information, refer to the Rapid Deployment Pack Knowledge Base at <http://www.hp.com/servers/rdp/kb> (Article 157).
